

Anethole

Anethol; Anetol; p-Propenylanisole. (E)-1-Methoxy-4-(prop-1-enyl)benzene.

$C_{10}H_{12}O = 148.2$.

CAS — 104-46-1; 4180-23-8 (E isomer).

NOTE. Distinguish from Anethole Trithione (below).

Pharmacopoeias. In *Ger.* Also in *USNF*.

USNF 26 (Anethole). Obtained from anise oil or other sources or prepared synthetically. At or above 23° anethole is a colourless or faintly yellow liquid with a sweet taste and the aromatic odour of aniseed. Very slightly soluble in water; soluble 1 in 2 by volume of alcohol; readily miscible with chloroform and with ether. Store in airtight containers. Protect from light.

Profile

Anethole has similar properties to those of anise oil (below). It is also included in mixed terpene preparations used in urinary-tract disorders.

Preparations

Proprietary Preparations (details are given in Part 3)

Multi-ingredient: **Austria:** Rowatinex; **Canad.:** Beech Nut Cough Drops; Bentasil Licorice with Echinacea[†]; Bentasil[†]; Bronco Asmol; **Chile:** Rowatinex; **Cr.:** Rowatinex; **Ger.:** Rowatinex; **Hong Kong:** Neo-Rowatinex; **Rowatinex; Hung.:** Rowatinex; **Indon.:** Listerine Coolmint; **Ir.:** Rowatinex; **Israel:** Rowatinex; **Malaysia:** Rowatinex; **Philipp.:** Listerine Coolmint; Rowatinex; **Pol.:** Rowatinex; **Spain:** Pulmofasa; Rowanefrin; Vicks Formula 44[†]; **Switz.:** GU Eau[†]; Neo-Angin sans sucre; Pectocalmine N; **Thail.:** Rowatinex; **Venez.:** Rowatinex.

Anethole Trithione

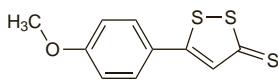

Anethole Dithiolthione; Anetol tritona; SKF-1717; Trithioparamethoxyphenylpropene. 5-(4-Methoxyphenyl)-3H-1,2-dithiole-3-thione.

$C_{10}H_8OS_3 = 240.4$.

CAS — 532-11-6.

ATC — A16AX02.

ATC Vet — QA16AX02.

NOTE. Distinguish from Anethole (above).

Profile

Anethole trithione has been given orally in the management of dry mouth (p.2140) and as a choleric. The usual daily dose is 75 mg, generally in 3 divided doses before meals; doses of up to 150 mg daily have sometimes been used. Anethole trithione may cause discolouration of the urine.

Preparations

Proprietary Preparations (details are given in Part 3)

Belg.: SulfaRem; **Canad.:** Sialor; **Fr.:** SulfaRem; **Ger.:** Mucinol[†]; **India:** Hepasulfol; **Port.:** SulfaRem[†]; **S.Afr.:** SulfaRem[†]; **Spain:** Sonicur; **Switz.:** SulfaRem; **Venez.:** Sialor.

Multi-ingredient: **India:** Hepasulfol-AA.

Angelica

Andělikový kořen; Angelica; Angelicae radix; Angelikarot; Angélique, racine d'; Angyalgyökér; Archangelica; Archangelicæ Radix; Korzeń arcydziegla; Šventagaršvių šaknys; Väinönpätkunjuri.

CAS — 8015-64-3 (angelica oils).

Pharmacopoeias. In *Eur.* (see p.vii).

Jpn has separate monographs for *Angelica acutiloba* (Japanese Angelica) and *A. dahurica*.

Chin. specifies *A. dahurica*, *A. dahurica* var. *formosana*, *A. pubescens*, and *A. sinensis*.

Ph. Eur. 6.2 (Angelica Root). The whole or cut, carefully dried rhizome and root of *Angelica archangelica* (*Archangelica officinalis*) containing a minimum of 0.2% v/w of essential oil, calculated with reference to the dried drug.

Profile

Angelica (*Angelica archangelica*) is widely used in herbal medicine. The root is used as a bitter to stimulate the appetite. Angelica also has diaphoretic and expectorant properties and has been used for circulatory and respiratory disorders.

Angelica oil is used in aromatherapy.

Angelica contains furanocoumarins and may cause photosensitivity reactions or interfere with anticoagulant therapy.

Other *Angelica* spp. that are used in herbal medicine include *A. acutiloba* (Japanese angelica), *A. dahurica*, *A. pubescens*, and *A. sinensis* (see Dong Quai, p.2258).

Angelica stems are candied for culinary use.

Homeopathy. Angelica has been used in homoeopathic medicines under the following names: Archangelica; Angelica archangelica; Angelica archangelica var. archangelica.

Preparations

Proprietary Preparations (details are given in Part 3)

Ger.: Pascovegeton[†].

Multi-ingredient: **Arg.:** Sigmafem; **Austral.:** Capsella Complex; Dong Quai Complex; Extrafile Meno-Care; Feminine Herbal Complex; Infant Tonic[†]; Ironata; Lifesystem Herbal Formula 4 Women's Formula[†]; Medinan Esten[†]; Vitatona; Women's Formula Herbal Formula 3; **Austria:** Abdomilon N; **Canad.:** Natural HRT; **Cr.:** Abdomilon[†]; Dr Theiss Rheuma Creme[†]; Dr Theiss Schweden Krauter; Dr Theiss Schwedenbitter; Iberogast; Klosterfrau Melisana; Original Schwedenbitter; Stomaran; Valofit Neo; **Fr.:** Distylose; Mediclor Tisane Digestive No 3; **Ger.:** Abdomilon N; Anore X N[†]; Caromin[†]; Doppelherz Melisengelje[†]; Gastritol; Iberogast; Infra-tract[†]; Melisengelje; Schwedentonic Elixier; Stovalid N[†]; **Hong Kong:** Phytoestrin[†]; **Ital.:** Florelax; **Philip.:** Hemofer; Zlönigin; **Pol.:** Melis-Ton[†]; Melisa; Melisana Klosterfrau; Melissed; Nervosol; **Rus.:** Doppelherz Melissa (Доппельгерц Мелиса); Original Grosser Bittner Balsam (Оригинальный большой Бальзам Биттера); **S.Afr.:** Melisengelje; Spiritus Contra Tussim Drops; **Singapore:** Phytoestrin; **Spain:** Agua del Carmen; Himelan[†]; **Switz.:** Alcoolat de Melisette[†]; Gastrosan; Iberogast; Phyto-med Gastro[†]; **UK:** Melissa Comp.

Aniseed

Anice; Anis; Anis, fruit d'; Anís, semilla de; Anis Verde; Anis Vert; Anise; Anise Fruit; Anisi fructus; Áñizstermés (fruit); Anyžiu vaisiai (fruit); Anýzovy plod (fruit); Owoc anyżu (fruit).

Pharmacopoeias. In *Eur.* (see p.vii).

Ph. Eur. 6.2 (Anise; Anisi Fructus). The whole dried fruit of *Pimpinella anisum*, containing not less than 2% v/w of essential oil. It has an odour reminiscent of anethole. Protect from light.

Profile

Aniseed is carminative and mildly expectorant; it is used mainly as anise oil or as preparations of the oil. It may cause contact dermatitis, probably due to its anethole content.

Aniseed is the source of anise oil (below).

Preparations

Proprietary Preparations (details are given in Part 3)

Multi-ingredient: **Austral.:** Neo-Cleanse; **Austria:** Asthmatee FF-EM-ES; Brady-S-Magentropfen; Euka; Florisannin[†]; Nesthakchen; Species Carvi comp[†]; **Br.:** Balsamo Branco; Camomilla; **Canad.:** Herbal Laxative; **Chile:** Patommel; **Cr.:** Blahungas N[†]; **Fr.:** Elixer Bonjean; Herbesan; Mediclor Tisane Digestive No 3; Mucinum a l'Extrait de Cascara; **Ger.:** Em-eukal Husten- und Brusttee[†]; Em-medical[†]; Floradix Multipretten N; Majocamin-Tea; Ramden Krauter; rohsalaf[†]; Stovalid N[†]; **Hong Kong:** Mucinum Cascara[†]; **Israel:** Jungborn; **Ital.:** Anice (Specie Composta)[†]; Cadifen; Cadimina Dicalmif; Lassatina[†]; Tisana Kelemata; **Pol.:** Apironorm; **Port.:** Mucinum; **Rus.:** Original Grosser Bittner Balsam (Оригинальный большой Бальзам Биттера); **S.Afr.:** Clairo; Cough Elixir; **Spain:** Crislaxo; Digesto-vital[†]; Laxante Sanatorium; Laxomax[†]; **Switz.:** Kemosan Elixir; Kemosan Heidleberger Poudre; Tisane favorisant l'allaitement; **UK:** Herb and Honey Cough Elixir; Revitonil; **Venez.:** Neo-Atropan[†].

Anise Oil

Anís, aceite esencial de; Anis, huile essentielle d'; Aniseed Oil; Anisi aetheroleum; Anisi Etheroleum; Anisolja; Anisöljy; Áñisolaj; Anyžiu eterinis aliejus; Anyżóvá silice; Esencia de Anís; Essence d'Anis; Olejek anyzowy; Oleum Anisi.

NOTE. The name anise oil is also applied to Star Anise Oil, p.2392.

Pharmacopoeias. In *Chin.* and *Eur.* (see p.vii). Also in *USNF*.

Ph. Eur. 6.2 (Anise Oil; Anisi Aetheroleum). An essential oil obtained by steam distillation from the dry ripe fruits of *Pimpinella anisum*. It contains less than 1.5% linalol, 0.5 to 5.0% estragole, less than 1.2% α -terpineol, 0.1 to 0.4% cis-anethole, 87 to 94% trans-anethole, 0.1 to 1.4% anisaldehyde, and 0.3 to 2.0% pseudoisoeugenyl 2-methylbutyrate. A clear, colourless or pale yellow liquid. Relative density 0.980 to 0.990. Fp. 15° to 19°. Store in well-filled, airtight containers at a temperature not exceeding 25°. Protect from light.

USNF 26 (Anise Oil). The volatile oil distilled with steam from the dried, ripe fruit of *Pimpinella anisum* (Apiaceae) or from the dried ripe fruit of *Illicium verum* (Illiaceae). Congealing temperature not lower than 15°. Soluble 1 in 3 of alcohol (90%). Store in well-filled airtight containers. If solid material has separated, carefully warm the oil until it is completely liquefied, and mix before using.

Incompatibility. PVC bottles softened and distorted fairly rapidly in the presence of anise oil, which should not be stored or dispensed in such bottles.¹

1. Department of Pharmaceutical Sciences of the Pharmaceutical Society of Great Britain. Plastics medicine bottles of rigid PVC. *Pharm J* 1973; **210**: 100.

Profile

Anise oil is carminative and mildly expectorant and is a common ingredient of cough preparations. It is also a flavour. Anise oil is used in aromatherapy.

It may cause contact dermatitis, probably due to its anethole content.

◊ For references to aniseed and anise oil, see Aniseed, above.

Preparations

BP 2008: Camphorated Opium Tincture; Compound Orange Spirit; Concentrated Anise Water; Concentrated Camphorated Opium Tincture; **USNF 26:** Compound Orange Spirit.

Proprietary Preparations (details are given in Part 3)

Multi-ingredient: **Austral.:** Cough Relief; Digestive Aid; Garitech; **Austria:** Bradosil; Bronchostop; Expectal-Tropfen; Heumann's Bronchialtee; Kamillosal; Luuf-Iustente; Neo-Angin; Nesthakchen; **Braz.:** Ovarius-dan[†]; **Canad.:** Beech Nut Cough Drops[†]; **Cr.:** Biottusil; Bronchosan; Bronchostop; Neo-Angin; Stopangin; **Fr.:** Paragore; **Ger.:** Aspasmon N[†]; Bronchofoton; Em-eukal Husten- und Brusttee[†]; Em-medical[†]; Ephepect-Pastillen N; Floradix Multipretten N; Heumann Bronchialtee Solubifix T; Hevertopct N[†]; Kamillosal Mundspray; Leber-Galle-Tropfen 83[†]; Neo-Ballistol; Pulmomod mite SL[†]; Pulmotrin; ratioGast[†]; Repha-Os; Salniak[†]; Salivathymol N; Sinufront; **Hong Kong:** Ephepet Blocker; **India:** Beztostyme; Kamilsan-N; Neopeptine; **Indon.:** Minyak Telon Cap Tiga Anak; OBH; Silex; **Neth.:** Bronchicum; **Philip.:** Kamilloan M; **Pol.:** Carmolis; Herbolein D; Tobacoff; **Rus.:** Carmolis (Кармомис)[†]; Carmolis Fluid (Кармомис Жидкость)[†]; Stopangin (Стопангин); **S.Afr.:** Borsdruppels; Paragore-Elixier; Puma Cough Balsam; **Spain:** Caminativo lys[†]; Caminativo Juventus; H Tuscan; **Odontocromil c Sulfaimidat;** **Switz.:** Bronchofluid N[†]; Carmol; Carmol Plus[†]; Germ; Kamillosal; Makaphyt; Gouttes antitussives; Neo-Bronchol; Odontal; Pastilles bronchiques S nouvelle formule; Pastilles pectorales Demo N; Penta; **Thail.:** Gas-Nep; Mesto-Of; **UK:** Hactos; Honey & Molasses; Lightning Cough Remedy; Potters Strong Bronchial Catarrh Pastilles; Potters Sugar Free Cough Pastilles; Slippery Elm Stomach Tablets; Vegetable Cough Remover; Zubes; Zubes Blackcurrant.

Anisodamine

6-Hydroxy-hyoscynamine.

$C_{17}H_{23}NO_4 = 305.4$.

CAS — 55869-99-3.

Pharmacopoeias. *Chin.* has a monograph for Raceanisodamine and Anisodamine Hydrobromide.

Profile

Anisodamine is an alkaloid isolated from *Scopolia tangutica* (*Anisodus tanguticus*), a plant used as a traditional medicine in China. It is related to atropine and hyoscynamine and has similar antimuscarinic properties (p.1221). Anisodamine is given orally for its spasmolytic actions in the treatment of gastrointestinal spasm. It has also been tried in circulatory disorders, septic shock, and organophosphorus poisoning.

Apis mellifera

Abeille domestique; Abeja de la Miel; The honey bee.

Медоносная Пчела Домашняя

Pharmacopoeias. *Eur.* (see p.vii) includes the live worker honey bee for homoeopathic preparations.

Ph. Eur. 6.2 (Honey Bee for Homoeopathic Preparations; *Apis Mellifera ad Praeparationes Homoeopathicas*). Live worker honey bee, *Apis mellifera*.

Profile

The honey bee is a source of purified honey (p.1948), royal jelly (p.2382), propolis (p.2373), and bee pollen (see Pollen and Pollen Extracts, p.2370).

Homeopathy. Preparations of *Apis mellifera* have been used in homoeopathic medicines under the following names: *Apis*; *Apis mellifica*; *Apis mel*; *Apis mell*.

Arthritis. Bee venom has traditionally been used in the treatment of arthritis.^{1,2} In vitro have shown that bee venom has anti-inflammatory activity similar to that of cyclophosphamide. Melittin appears to be the active constituent, and seems to act by interfering with superoxide radical production from human leucocytes.¹
