(dibrompropamidine)

Pharmacopoeias. In *Eur.* (see p.vii).**Ph. Eur.** 6.2 (Dibrompropamidine Diisetionate). A white or almost white, crystalline powder. Freely soluble or soluble in water; slightly soluble in alcohol; practically insoluble in dichloromethane. A 5% solution in water has a pH of 5.0 to 6.0.**Profile**

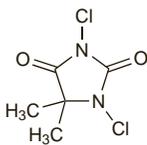

Dibrompropamidine isetionate is an aromatic diamidine antiseptic similar to propamidine (p.1660). It is bactericidal against Gram-positive bacteria but is less active against Gram-negative bacteria and spore-forming organisms. It also has antifungal properties. It is available as topical preparations for the local treatment of minor eye and skin infections.
