

respiratory-tract disorders. It has also been used for intestinal amoebiasis.

Other *Euphorbia* spp. are used for a variety of disorders. The seeds and latex of *E. lathyrus* (caper spurge) have been used as a purgative but are too toxic for general use. Many species have been used as arrow poisons.

Preparations

Proprietary Preparations (details are given in Part 3)

India: Thankgod.

Multi-ingredient: **Austral.:** Asa Tones; Euphorbia Complex; Procold; Sambucus Complex†; **Belg.:** Toulynx; **Canad.:** Sirop Cocillana Codine; Sirop Cocillana Compose; **Hong Kong:** Cocillana Christo; Cocillana Compound; Mefedra-N†; **UK:** Antibron.

Euphrasia

Augentrost; Euphrasia; Euphrase; Eyebright.

Profile

Euphrasia, the aerial parts of various *Euphrasia* spp. including *E. roskoviana* and *E. officinalis* (Scrophulariaceae), has been used topically for blepharitis, conjunctivitis, and other eye disorders. However, such use is not generally recommended. Euphrasia has also been used for nasal catarrh and sinusitis, and to prevent snoring.

Homeopathy. Euphrasia has been used in homeopathic medicines under the following names: *Euphrasia officinalis*; *Euphrasia ex planta teta*; *Euph.*

Preparations

Proprietary Preparations (details are given in Part 3)

UK: Snore Calm.

Multi-ingredient: **Austral.:** Bilberry Plus; Euphrasia Complex; Euphrasia Compound; Eye Health Herbal Plus Formula 4; Lifesystem Herbal Plus Formula 5 Eye Relief†; Sambucus Complex†; **Ger.:** Herba-Vision Augenbad; **Ital.:** Altacura Ipragoce; Eulux Iridi; **Malaysia:** Eyebright Plus†; **Switz.:** Collypan; Oculosan; Tendro; **UK:** Se-Power; Vital Eyes.

Evening Primrose

King's Cureall; Onagre.

Profile

Evening primrose, the aerial parts of *Oenothera biennis* (Onagraceae) and related species of *Oenothera*, is reported to have sedative and astringent properties. It has been used in herbal preparations for respiratory and gastrointestinal disorders.

Evening primrose seed is the source of evening primrose oil (below), which is a source of essential fatty acids.

Preparations

Proprietary Preparations (details are given in Part 3)

Multi-ingredient: **Ital.:** Scleroris H.

Evening Primrose Oil

Helokkiöljy; Nakviš aliejus; Nattljusolja; Oenotherae oleum; Olej wiesiokowy; Olej wiesiokowy bezpośredniego tłoczenia (virgin evening primrose oil); Onagra, aceite de; Onagre, huile d'; Pupalkový olej.

Pharmacopoeias. In Eur. (see p.vii).

Ph. Eur. 6.2 (Evening Primrose Oil, Refined; *Oenotherae Oleum Raffinatum*). The fatty oil obtained from the seeds of *Oenothera biennis* or *O. lamarckiana* by extraction and/or expression, and then refined. A suitable antioxidant may be added. A clear, light yellow or yellow liquid. Relative density about 0.923. Practically insoluble in water and in alcohol; miscible with petroleum spirit (b.p.: 40° to 60°). Store in well-filled, airtight containers under an inert gas. Protect from light.

Adverse Effects and Precautions

See Gamolenic Acid, p.2308.

Effects on the nervous system. Temporal lobe epilepsy was diagnosed after treatment with evening primrose oil in 3 patients who had previously been diagnosed as schizophrenic.¹ Tonic-clonic (grand mal) seizures occurred in 2 additional schizophrenic patients during treatment with evening primrose oil.² All of these patients had received or were taking phenothiazine antipsychotics.

- Vaddadi KS. The use of gamma-linoleic acid and linoleic acid to differentiate between temporal lobe epilepsy and schizophrenia. *Prostaglandins Med* 1981; **6:** 375-9.
- Holman CP, Bell AJF. A trial of evening primrose oil in the treatment of chronic schizophrenia. *J Orthomol Psychiatry* 1983; **12:** 302-4.

Uses and Administration

Evening primrose oil is a source of linoleic and gamolenic acid which are essential fatty acids of the omega-6 series that act as prostaglandin precursors (see p.2308). Evening primrose oil has been given orally for the symptomatic relief of atopic eczema in usual doses of up to 3 grams twice daily; it is also used topically as a cream for the relief of dry or inflamed skin. Evening primrose oil has also been given orally for mastalgia. Evening primrose oil has been studied in a variety of other disorders including multiple sclerosis, rheumatoid arthritis, and the premenstrual syndrome. Mixtures of essential fatty acids (including EF-4, EF-

12, and EF-27) derived from evening primrose oil and other oils have also been investigated in various disorders, including diabetic neuropathy, restenosis after angioplasty, and skin damage after radiotherapy.

Pharmacopoeias. In Eur. (see p.vii).

Ph. Eur. 6.2 (Felypressin). A synthetic nonapeptide available as an acetate. A white or almost white powder or flakes. Freely soluble in water; practically insoluble in alcohol and in acetone. It dissolves in dilute solutions of alkali hydroxides. Store in airtight containers at a temperature of 2° to 8°. Protect from light.

Profile

Felypressin is a synthetic analogue of vasopressin (p.2411) with similar actions. Its antidiuretic effects are less than those of vasopressin. It is used as a vasoconstrictor in local anaesthetic injections for dental use when sympathomimetics should be avoided. It is also an ingredient of preparations that have been used in the treatment of pain and inflammation of the mouth.

Multi-ingredient: **Chile:** Digezin†; **Ital.:** Critichol; **Spain:** Menabil Complex†; **Venez.:** Cholipin.

Fennel

Édesköménytermés (bitter fennel); Fánkál, bitter (bitter fennel); Fánkál, söt (sweet fennel); Fenchel; Fenkoli, karvas (bitter fennel); Fenkoli, makea (sweet fennel); Fennel Fruit; Fennel Seed; Fenouil; Fenouil Amer; Fenouil amer; fruit de (bitter fennel); Fenouil doux; fruit de (sweet fennel); Foeniculi amari fructus (bitter fennel); Foeniculi dulcis fructus (sweet fennel); Foeniculum; Fruto de Hinojo; Funcho; Hinojo; Kartieji pankolių vaisiai (bitter fennel); Kerti édesköménytermés (sweet fennel); Owoc kopru włoskiego (bitter fennel); Plod fenylku obecného pravého (bitter fennel); Plod fenylku obecného sladkého (sweet fennel); Saldieji pankolių vaisiai (sweet fennel).

Pharmacopoeias. In Chin., Eur. (see p.vii), and Jpn.

Ph. Eur. 6.2 (Fennel, Bitter; Foeniculi Amari Fructus). It consists of the dry, cremoncarps and mericarps of *Foeniculum vulgare*, subsp. *vulgare*, var. *vulgare*. It contains not less than 4.0% v/w of essential oil, calculated with reference to the anhydrous drug. The oil contains not less than 60.0% of anethole and not less than 15.0% of fenchone. Bitter fennel is greenish-brown, brown, or green. Protect from light and moisture.

Ph. Eur. 6.2 (Fennel, Sweet; Foeniculi Dulcis Fructus). It consists of the dry, cremoncarps and mericarps of *Foeniculum vulgare*, subsp. *vulgare*, var. *dulce*. It contains not less than 2.0% v/w of essential oil, calculated with reference to the anhydrous drug. The oil contains not less than 80.0% of anethole. Sweet fennel is pale green or pale yellowish-brown. Protect from light and moisture.

Profile

Fennel is the source of fennel oil (below). It is used as a flavour and carminative, although the efficacy of such traditional remedies in infant colic is considered dubious (see Gastrointestinal Spasm, p.1696). It is also used in herbal remedies for respiratory-tract disorders.

Preparations

Proprietary Preparations (details are given in Part 3)

Fennel Oil

Aetheroleum Foeniculi; Bitterfänkålsolja (bitter-fennel fruit oil); Esencia de Hinojo; Essência de Funcho; Fenouil amer (fruit de), huile essentielle de (bitter-fennel fruit oil); Foeniculi amari fructus aetheroleum (bitter-fennel fruit oil); Hinojo, aceite esencial; Karčiūju pankolių vaisių eterinis aliejus (bitter-fennel fruit oil); Karvaskenfoljöljy (bitter-fennel fruit oil); Olejek kopru włoskiego (bitter-fennel fruit oil); Oleum Foeniculi; Rezene Yağı; Silice fenylu horčkého (bitter-fennel fruit oil).

Pharmacopoeias. In Eur. (see p.vii) and Jpn. Also in USNF. **Ph. Eur. 6.2** (Bitter-Fennel Fruit Oil; Foeniculi Amari Fructus Aetheroleum). The essential oil obtained by steam distillation from the ripe fruits of *Foeniculum vulgare*, subsp. *vulgare*, var. *vulgare*. It contains 12.0 to 25.0% fenchone and 55.0 to 75.0% anethole. A clear, colourless or pale yellow liquid with a characteristic odour. Store in well-filled, airtight containers at a temperature not exceeding 25°. Protect from light.

USNF 26 (Fennel Oil). The volatile oil distilled with steam from the dried, ripe fruit of *Foeniculum vulgare* (Apiaceae). Congealing temperature not lower than 3°. Soluble 1 in 1 of alcohol (90%). If solid matter has separated, carefully warm the oil until it is completely liquefied, and mix before using. Store in airtight containers.

Profile

Fennel oil is used as an aromatic flavour and carminative (but see the comment under Fennel, above); the German expert committee for herbal drugs and preparations (Commission E) considers that the use of fennel oil in infants and toddlers is contra-indicated. It is also used in herbal remedies for respiratory-tract disorders and in aromatherapy.

Preparations

Proprietary Preparations (details are given in Part 3)

Фенивериния Бромид

$C_{22}H_{29}BrN_2O = 417.4$.

CAS — 125-60-0.

ATC — A03AB21.

ATC Vet — QA03AB21.

Profile

Fenpipramide (as the hydrochloride) and its methobromide, fenpiverinium bromide have been used as antispasmodics. Fenpipramide hydrochloride is also used for its antimuscarinic actions in veterinary medicine.

Preparations

Proprietary Preparations (details are given in Part 3)

Multi-ingredient: **Cz.:** Aligfen; Analgin; Spasmopan; **Pol.:** Spasmalgon; **Rus.:** Baralgetas (Баралгетас)†; Maxigan (Максиган); Nebgalan (Небгалан); Novigan (Новиган); Revalgin (Ревалгин); Spasgan (Спазган); Spasmalgon (Спазмалгон); Spasmalin (Спазмалин); **S.Afr.:** Baralgan†; **Thail.:** Kanegan; **Venez.:** Flembar.

Fenugreek

Bockhornsfrö; Bockhornsame; Faenum-Graecum; Fenogreco; Fenugrec; Görögzséhamag; Greek hay; Ožrägi séklos; Sarviapaliansiemi; Semen Foenugraeci; Semen Trigonellae; Semeno piskávce řeckého sena; Trigonella Foenugraeci Semen; Trigonella foenugraeci semen.

Pharmacopoeias. In Chin. and Eur. (see p.vii).

Ph. Eur. 6.2 (Fenugreek). The dried ripe seeds of *Trigonella foenum-graecum*. It has a strong characteristic odour. Protect from light.

Profile

Fenugreek has been used as an appetite stimulant and as an ingredient in preparations for respiratory disorders. It also has emollient properties.

Adverse effects. Loss of consciousness occurred in a 5-week-old infant after ingestion of a herbal tea containing fenugreek.¹ On recovery the infant and his urine had an aroma characteristic of that found in 'maple syrup urine disease', an inborn condition involving defective metabolism of branched-chain amino acids.
